

MEDITRAIN

E-Learning

What is **MediChatAI**?

MediChatAI is your on-demand real time personal assistant. A tool for anyone in your organization that provides instant answers to questions about the MEDITECH platform.

MediChatAI is a NEW Artificial Intelligence tool from MEDITRAIN that allows you to ask questions about how MEDITECH works. Rather than find a manual, or schedule an instructor led class, just ask **MediChatAI**. A real-time personal assistant, available to all staff in your hospital.

How Does It Work?

Simply ask a question:

- Providers might ask, "How do I access a patient's medical history?"
- Nurses could inquire, "How do I update medication information?"
- Ward Clerks could ask, "How do I submit maintenance requests?"

Why **MediChatAI**?

Everyone needs an expert by their side:

- Instant answers help new staff understand MEDITECH faster.
- Eliminate the need for finding manuals or complete training courses.
- Available 24/7, always there for you.

Integration With MEDITRAIN E-Learning Content

MediChatAI will soon link directly to your MEDITRAIN E-Learning training content, providing detailed "micro" tutorials specific to your hospital and your unique MEDITECH install.
